

Kindergarten Report - 28th June, 2019

Staff attended a Professional Development Day in Melbourne on Wednesday the 19th of June, the focus was 'Responding to Children's Behaviours'.

We were also lucky to have Anja visit us for a couple of days as she was replacing Kass.

The children have all been busy making discoveries through observation and play. The recent frost was a great opportunity for us to put our scientist hats on, set out water in pots and trays, hypothesising about what was going to happen and then returning to kinder to see the results.

A great highlight was a return visit to our friends at the Darlingford Nursing Home. Together, the children and residents read stories and played. The biggest highlight for the residents was observing the children as they played and interacted with each other.

We also had a visit to our bush setting, nature's playground. The children just love it.

Abbey Harvey joined us for the last week of term from the Alexandra Secondary College for work experience.

A big thank you to our local Lions Club members for providing the children with a sausage sizzle on their last day.

Please remember to make sure all fees have been finalised for Term 2, as Term 3 notices will be distributed early next term.

Picture Plates - We would like to get feedback from parents/families if they are interested in children creating the plates in Term 3 ???

Wishing you all safe and happy holidays.

Cheers, Megan and Kass
