

Eildon Kindergarten Report - 18 June 2021

The children have been enjoying our regular walks on the Eildon Primary School Arboreal Wonderland Tracks. We have seen kangaroos, observed spiders in their natural habitat and even discovered dinosaur footprints!!! This has been a great resource to access as due to extreme weather conditions we have been unable to participate in our normal Busk Kinder Days.

This week there has been a lot of construction with cardboard boxes, scissors and tape. Imaginations have been running wild and the children have even been using their creations as a source of transport to get home. Connor and Sophie both went home in boats last week!

Please remember to collect old food boxes etc as we love to recycle them at the centre.

Scissor skill has been a focus, working closely with the children modelling and assisting when completing tasks that require scissor use. This is something you can also do at home especially on a cold rainy day. If you require a pair of scissors we would be happy to provide you with a pair from the Kinder.

Kass and Megan participated in another speech therapist zoom meeting, and received some great resources and ideas to help assist the children with language development. We are currently providing opportunities to enhance knowledge of letters and their sounds and also encouraging longer sentence structure.

Community Centre games have focused on number recognition.

Sing and grow with Beth will cease at the end of this term, due to covid and missed sessions we will be re-engaging with her in Term 4 for three sessions.

Amy Harvey will be joining a us next week for her school-based work experience.

Pictureplate information will be going out before the end of term.

Reminder to please return your child's 'All About Me' page if you have not already done so.

Cheers, Megan & Kass

Connor and Sophie heading home in
