

Kindergarten Report

Friday 22nd May 2020

The term is passing us by at a rapid speed, very busy unusual times. We hope you are all taking care of yourselves and those close to you.

The children have enjoyed the light box, looking at gel letters and numbers becoming familiar with them in their written forms. This activity has also lead to counting, identifying letters in our names and discussing the different sounds that the letters make.

We have been creating a lot of beautiful art and craft, such as our feelings, monsters, dye prints and magic painting. The art work helps the children express themselves, and make meaning. This provides us with the chance to ask questions, introduce new concepts and develop vocabulary .

Nature's playground, our own beautiful surroundings within the Kinder and School grounds. The children discovered many of nature's beautiful characteristics, hugging trees, feeling different tree trunk textures, finding spider webs and other small creatures. The open spaces encourage us to run and run improving gross motor skills and fitness.

Art work (reaching out to a family member or friend) has been posted. If you participated your special person should be receiving some very special mail soon.

Science was also very exciting at Kinder. We used some water, oil, food dye and an alka seltzer tablet to create our own mini lava lamp.

The number of children attending the centre is expected to increase with the return to school on Tuesday. Please adhere to your staggered sign in and pick up times to prevent congestion at the gate.

Cheers,
Megan and Kass.
